

Power Systems Design: Empowering Global Innovation

Paultre on Power - Steve Bottari of Fuji Electric on alternate energy (Podcast)

Date: 07/21/2014

Categories: Clean Energy, Embedded, Energy Harvesting, Power Management, Smart Power Grid

In this podcast Steve Bottari, General Manager of Fuji Electric's semiconductor division, talks to Alix Paultre of Power Systems Design about the issues of integrating alternate energy sources into our electrical and electronic systems. From harvested energy in portable devices to solar & wind on the power grid, the ability to manage non-traditional power sources will be key to many next-generation designs.
