

The Importance of Website Enhancements for B2B Companies

Growing. Adapting. Evolving.

75%

of the U.S. population owns a smart phone and 74% of visitors are more likely to return to a site if it's mobile -friendly مر مر مر مر مر مر مر

90% of B2B product searches start online

Not sure who to call? No problem, let us help.

732-560-9410

With a comprehensive selection of white papers, training modules and videos, Fuji Electric believes that

A good website gives you the tools you need to succeed in today's competitive market

Studies show that after completing a product-specific online course,

93% of people

feel more suited to sell that product. That's why Fuji Electric offers self-paced training modules on our website

24/7/365

Our mobile-friendly design means that you can access our website anytime, anywhere. From the oil fields of Texas to a factory in Mexico, we've got you covered

Fuji Electric now offers a comprehensive list of

FAQs for HMI and Distribution & Control

to help answer your most common questions on

our products

Fuji Electric's newly re-designed website offers easy-to-use

Product Selector Tools to help you find the right product for your application

It pays to be friendly... Mobile-friendly.

Google search rankings now factor in a site's mobile friendliness, so you could be hurting yourself if your site isn't optimized for mobile

Did you know that **traffic to B2B sites**

has more than doubled over the

past two years? It's more important than ever that B2B companies enhance their websites to suit the busy schedules and evolving needs of their customers
