

Intelligent (IPM) Power Modules

(IPM) with Fuji Electric's VR "on chip sensing" IGBT

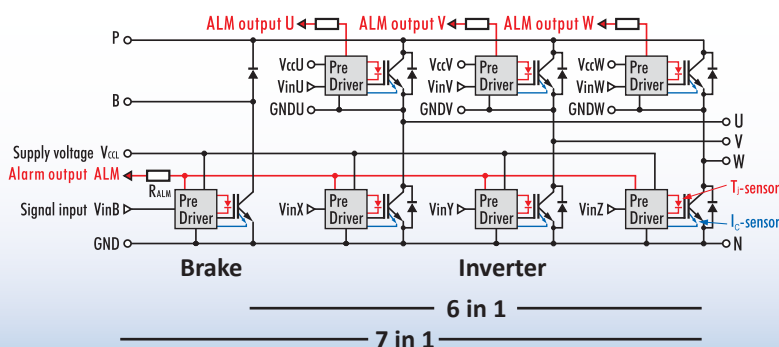

FEATURES

- VR IGBT-Chip with on chip Tj sensing
- 600V and 1200V / 10A to 400A
- Driver / Ctrl + protection
- Alarm + temp sensor outputs
- On-chip temperature and current sensors
- 4 separate power supplies required
- 6 in 1 and 7 in 1 / full inverter section + brake
- Suited for industrial application
