## **Notice of Discontinued Product**

Greetings:

We thank you for your business and your continued support of Fuji Electric HMI Products.

This is notification that the MONITOUCH HMI TECHNOSHOT TS1000 Series will be discontinued. The TS1000 Smart Series will be the upgraded successor product. We have developed the following information about the discontinuation and the upgrade guide for your review and migration planning.

Discontinued Model	MONITOUCH HMI TECHNOSHOT TS1000 Series
Reason of Discontinuance	Production upgrade
Replacement Model <a href="#">Please refer to the Replacement Guide</a>	MONITOUCH HMI TECHNOSHOT TS1000 Smart Series
Last Purchase Order Date	March 31, 2020
Price Increase	None
Repair Service	7 years from the last purchase order date (NEW)

TS1000 applications can be easily migrated to the TS1000 Smart Series with the configuration software V-SFT-5 (\*Ver. 5.4.44.0 and later.) You can download the update module from our website for free ([click](#).) Additionally, the panel cutout size of TS1000 Series and TS1000 Smart Series are the same, so there is no need to modify the enclosure.

We appreciate your understanding and cooperation. Please contact us should you have any questions or concerns about this upcoming discontinuation and/or transition path to the TS1000 Smart Series.

Sincerely,

*David Schrader*

# 3. Power Supply Terminal

	TS1000 Smart series	TS1000 series
Power supply terminal	DC24V (+/- terminal only. <b>No FG terminal</b> ) Screw head: plus (+)	DC24V (+/- /FG terminal) Screw head: minus (-)

- \* TS1000 Smart series is not equipped with a frame ground (FG) terminal. When replacing TS1000 series with the TS1000S, there is no wiring of the FG.
- \* Use a dedicated 24-V power supply for supplying power to the TS1000S.  
Do not ground the positive terminal (positive grounding) of the 24-V power supply. If a positive ground is established and an external communication device such as a computer is connected, the 24-V power supply may short circuit and cause damage.  
If a positive ground is unavoidable, refer to [TS1000 Smart Hardware Specifications] manual.
