AEC INDUSTRIAL SOLUTIONS

FE Fuji Electric
Innovating Energy Technology

“Fuji Electric AC Drives and HMI are integral parts of the Mobile Centrifuge Control application designed by AEC Industrial Solutions in Red Deer Canada.”

“AEC Industrial Solutions was in need of an extremely robust VFD and HMI solution for our mobile centrifuge control panels. We required equipment that could withstand very extreme conditions, such as traveling down hundreds of miles of rough roads between locations, as well as severe weather conditions including temperatures ranging from -50 degree in Northern Canada’s Arctic winters, to the hot and dusty conditions of West Texas. We definitely found the robustness we required, and have had great results using Fuji Electric’s FRENIC-MEGA VFDs and MONITOUCH V9 HMI.”

Fuji Electric’s FRENIC-MEGA VFD series are high performance, multifunctional inverters providing the industry’s highest performance for three phase motor applications. The MONITOUCH V9 HMI makes automation complete with optimum operability and intuitive controls.

Fuji Electric Corp. of America is a wholly owned subsidiary of Fuji Electric Co., Ltd., and has been responsible for sales and distribution of the company’s products since 1970. Fuji Electric Co., Ltd. began developing power electronics equipment in 1923, and is a global leader in industrial products.

AEC is Western Canada’s premier industrial solutions provider. AEC has developed an esteemed reputation as a service oriented, value added distributor, integrator and manufacturer of Automation, Electric & Control packages
