

# Fuji Electric AC Drives Training

## Training at Your Facility or Ours!

At Fuji Electric, we provide detailed product sales training. Our team of experts is readily available to deliver the details of our drives at a higher level. Our goal is to give sales personnel in depth background information to help push Fuji Electric drives with their customers. With multiple levels of training available, choose the right type of training for your team!

### Copper Training - Initial Technical Training

Basics of troubleshooting a Fuji Electric Drive such as: use of keypad, fault code review, Basic Startup support.

### Silver Training - Advanced Technical Training

This includes advanced troubleshooting, IGBT and Diode testing, fan and printed circuit board replacement procedures, and troubleshooting test points.

### Gold Training - Elite Technical Training

This training is suited for those who aim to become an Authorized Repair Service Company for Fuji Electric. There are stringent requirements to become authorized and there are only a handful in the USA.

## Customized Training

Our team can work with you to build a customized training program to meet your needs. Whether you need training for all our drive lines or only one specific drive, we can tailor the details of the program around your needs.
